

Case Study

WOMEN ACCESSORIES

ROAS: 2.7

Client Overview

Our client, an online store selling women's accessories, wanted to increase their sales and improve their marketing efforts. They decided to use a strategy that targeted different types of customers, tested various ads, and optimized their advertising budget.

Campaign Objective

The main goals were to increase sales by getting more purchases through the online store, target the right audience by effectively reaching different types of customers, and optimize the budget by using the advertising budget efficiently to get the best results.

Campaign Strategy

Audience Research and Segmentation:

- • **Core Audience:** Target women aged 18-35 interested in fashion, accessories, and trends.
- • **Custom Audiences:** Retarget previous website visitors, email subscribers, and past purchasers.
- • **Lookalike Audiences:** Create lookalike audiences based on the client's existing customers to reach similar potential buyers.
- • **Catalog Ads:** Utilize dynamic catalog ads to showcase personalized product recommendations.

Campaign Strategy

Budget Optimization:

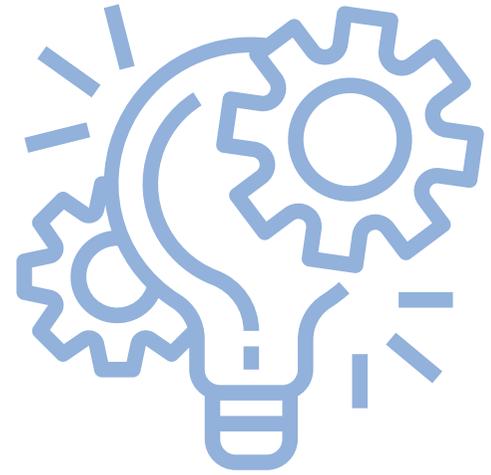

- • **Campaign Budget Optimization (CBO):** We tested allowing Facebook to automatically allocate the budget to the best-performing ad sets within a campaign. This method helped maximize the return on ad spend (ROAS) by dynamically shifting funds to where they were most effective.
- • **Ad Set Budget Optimization (ABO):** We also tested allocating specific budgets to individual ad sets. This approach allowed us to have precise control over spending, focusing on high-performing segments and ensuring that underperforming ones did not drain resources.
